Seminar Meetings: Wednesday 10:00-10:50, Haines 350

**Meeting Format:** (1) “open mike” (discussion of any issues pertaining to the research protocol); (2) discussion of selected audio clips (see below); (3) discussion of readings (see below) (if there’s time).

**Assignment for every meeting:** Bring two audio clips, from the material that you’ve been coding, and present them to the group with your comments/observations. These should be clips that will generate discussion. They may be particularly interesting, or else particularly difficult to code. If the latter, it’s preferable to present clips that are difficult to code for an interesting reason (not a “technical” reason such as too much wind noise making the speakers’ words difficult to understand).

**Oct. 7, Oct. 21, Nov. 4, Nov. 18:** Email to me, by 8:00pm the night before the class meeting, one question based on the assigned reading.

**Schedule of Readings for Discussion:**

**Oct. 7**

**Oct. 21**

**Nov. 4**

**Nov. 18**
